

I have very much enjoyed my satellite radio for the past several months since I've gotten it. I never listen to local radio anymore when I'm in my car. When I heard of satellite radio, I couldn't wait to get it because our local radio is terrible!! I don't want to write a long drawn out e-mail about any of this; I just want to support satellite radio and ask the FCC to reject the NAB's petition 04-160.
Thanks for your time.
